

Amazing Animals

Home Learning Pack for Nursery - Week Beginning 13th July 2020

This week in Nursery, we will be looking at Animal Habitats. We will be seeing where animals of the world like to live, how different their habitats are and how the animals are adapted to live there.

Here are a few ideas for this week's key focus.

- **Animal Sorting** - Sort animals into who lives on land and who lives in water. Are there any animals that live in both?
- **Changing Habitats** - What happens when we change habitats, for example, heat ice or add water to sand?
- **Animal and Habitat Matching Game** - Resources available on the internet.
- **Underwater Scene Craft Activity** -

I hope you have fun learning about animal habitats with your child and don't forget to send a photo or message about what they have seen, learnt or spotted.

Regards,

Mrs Birt
